² Non-Standardized returns ("Assuming No Surrender") assume no deduction for contingent deferred sales charge. Standardized Performance ("Assuming Surrender") reflects the maximum Surrender Charge under the policy. The maximum Surrender Charge for each premium payment is 8% for the first two years, 7% for year 3, 6% for year 4, 5% for year 5, 4% for year 6 and 3% by the 7th year for the 7-year Surrender Charge Period after that premium payment has been in the policy, with no surrender charge thereafter. The Standardized returns are as of the most recent calendar quarter-end.

³ Volatility/Risk Levels are assigned by New York Life. The Investment Divisions are grouped by risk classifications that reflect performance volatility based on Morningstar classifications as of December 31, 2020. Morningstar is a widely used independent research firm, which ranks mutual funds and other investment companies by overall performance, investment objectives and assets. Policy owners need to keep in mind, as applicable, that equity investments have been volatile historically. Investment options concentrated in bonds fluctuate in value in response to changes in interest rates. High-yield securities are generally considered speculative because they present a greater risk of loss than higher-quality debt securities and may be subject to greater price volatility. Non-US securities are subject to currency fluctuation risks and the risks of political and economic instability in the country of issuance. Investment options which are concentrated in economic sectors may be more volatile than more broadly diversified portfolios.

While there is no standard definition, generally "alternative" funds include nontraditional asset classes or strategies and/or illiquid assets. Alternative investments are speculative, can carry substantial risk, and may not be appropriate for all investors. For those investors who are able to bear greater risk in return for the opportunity they provide, alternative investments may be appropriate.
