

Growth in the market is good. Growth in fees isn't.

Life is full of ups and downs. That's true of the stock market as well. When the stock market is on the rise, investment fees typically go up, too. For investors who want to save over the long term for retirement, the New York Life Premier Variable Annuity-FP Series ("Premier") offers a unique advantage: the option to select a level product fee structure. With this innovative and patented fee structure, the product charges are based on the amount invested, not on the account value of the policy.¹ So, while fees from other accounts are rising or falling with the market, charges under Premier would remain level.

When are fees attractive?

- When they don't go up even when the account value goes up due to market growth. More earnings remain in the account with the potential to grow.
- When they are predictable: no surprises. The fee remains the same no matter what direction the market takes.
- When they go down. As an extra benefit, with the completion of the initial surrender-charge period, the product fee will be reduced by 0.20% (applies to the level and traditional fee structures).²

Remember, a variable annuity is a long-term financial product that offers tax deferral, along with a choice of many different investment options for potential growth and diversification.

Level vs. Traditional Product Fee Structure

Hypothetical example and not indicative of actual market performance.

Investments and insurance products are:
Not FDIC/NCUA Insured • Not Insured by Any Federal Government Agency • Not a Deposit
or Other Obligation of, or Guaranteed by, the Bank or Any of Its Affiliates • May Lose Value

	Level Fee Structure		Traditional Fee Structure		Fee Savings
	Account Value	M&E Charges: Dollar Amount	Account Value	M&E Charges: Dollar Amount	
Up Market	\$300,000	\$1,300	\$300,000	\$3,600	Level vs. Traditional \$2,300 \$1,100
	\$200,000	\$1,300	\$200,000	\$2,400	
Starting Premium	\$100,000	\$1,300	\$100,000	\$1,200	Traditional vs. Level \$340 \$580
Down Market	\$80,000	\$1,300	\$80,000	\$960	
	\$60,000	\$1,300	\$60,000	\$720	

This chart shows a hypothetical example of the difference between a level M&E fee structure and a traditional fee structure in a New York Life Premier Variable Annuity–FP Series. It is included for the purpose of explanation and does not show the performance of an actual investment.

In an up market, the level fee structure may work to the investor’s advantage, as more money stays in the account and potentially continues to grow. However, in a flat or down market, a traditional fee structure may be more advantageous. Remember, history shows that the market has been more often up than down.³

Like other market-based investments, assets in the Investment Divisions are subject to market risks and may fluctuate in value. Withdrawals are subject to ordinary income taxes and, if made prior to age 59½ may be subject to a 10% IRS penalty tax. Surrender charges may also apply.

¹ Patent #8,666,783

² The product fee, which is the mortality and expense (M&E) fee, is 1.30% for the level fee structure and is 1.20% for the traditional fee structure; after completion of the initial surrender charge period, the fee is reduced to 1.10% and 1.00% respectively.
